RE:STATION
FIXED

MAKING AN IMPACT, TOGETHER.

Our journey began with a single hashtag: #2MinuteBeachClean. What started as a small idea quickly grew into a social media movement, now engaging over 80,000 followers.

As a small but determined charity, we inspired people to clean up their beaches, building a powerful community with a huge impact.

Today, while we continue to care for our beaches, our mission has expanded upstream to green spaces, towns, cities, rivers and canals through the #2MinuteLitterPick campaign.

Together, we're tackling litter and plastic pollution wherever it begins. **Because all waterways lead to the ocean.**

Thank you for your interest in a Station.

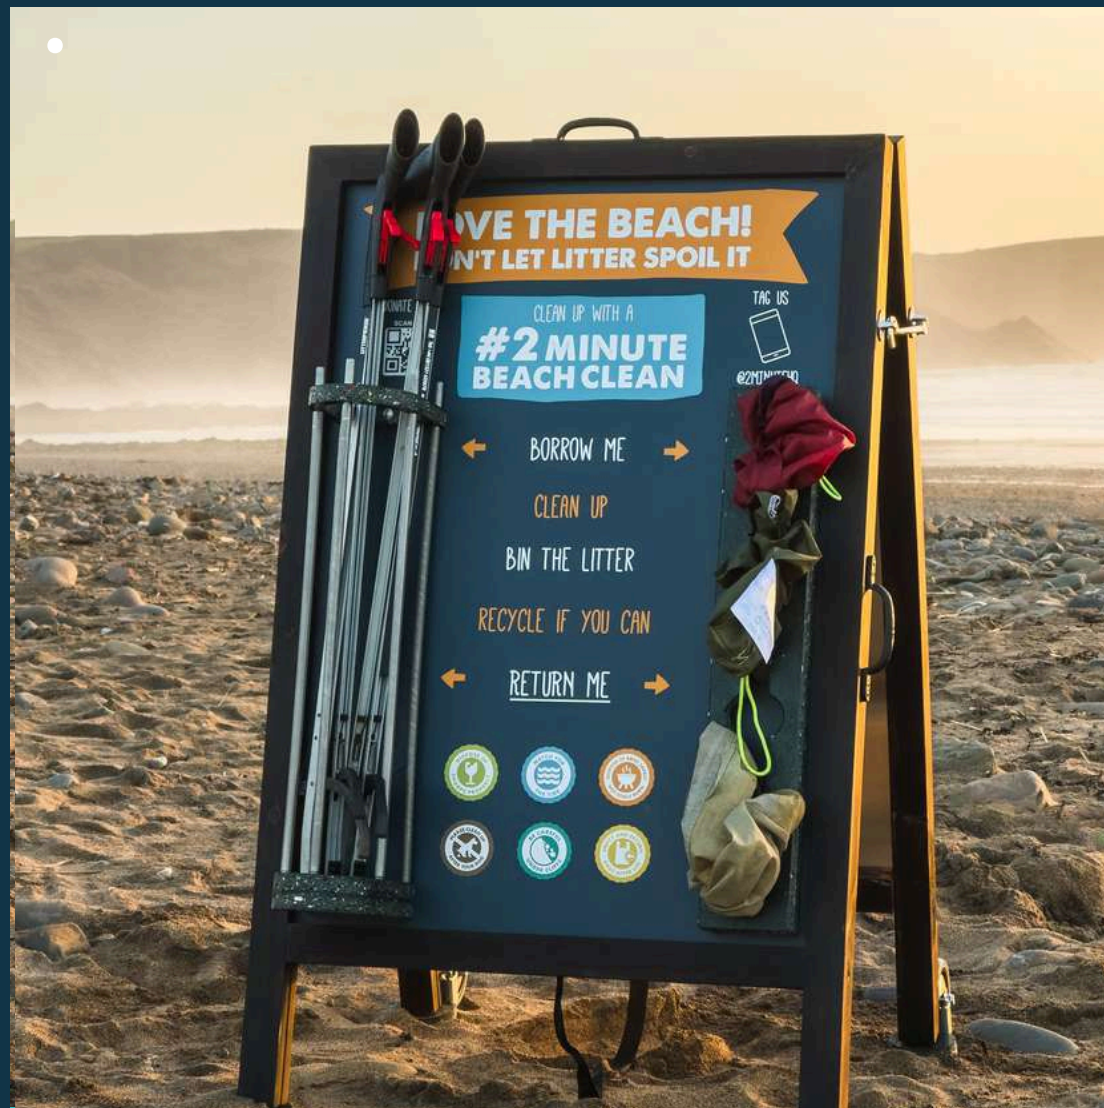

Each one reduces litter by up to 61%, encouraging communities to take meaningful action and make a tangible difference.

By choosing to act, you're not only contributing to a healthier planet but also connecting people, fostering positivity, and helping communities feel a shared sense of accomplishment.

Together, we are part of the solution.

RE:STATION. FREESTANDING FROM £500

The Re:Station is an evolution of our classic 2015 Station, embodying our #2minutesolution campaign with a strong focus on sustainability.

Designed and built in-house, it's crafted from post-consumer recycled (PCR) plastic waste repurposed from shop displays, discarded tent materials and poles diverted from landfill. It features FSC-certified timber, protected with a flame treatment and two coats of non-toxic stain sealer.

Key features include:

- **Customisable graphics:** printed directly onto recycled Aluminium Composite board.
- **Enhanced Durability:** Built to withstand long-term use in any environment.
- **Compact & Sturdy:** Weighs under 20kg and measures 1100mm x 700mm x 250mm (closed).
- **Easier mobility:** Optional Removable Wheels for effortless mobility.

Available in two styles – Litter Pick or Beach Clean.

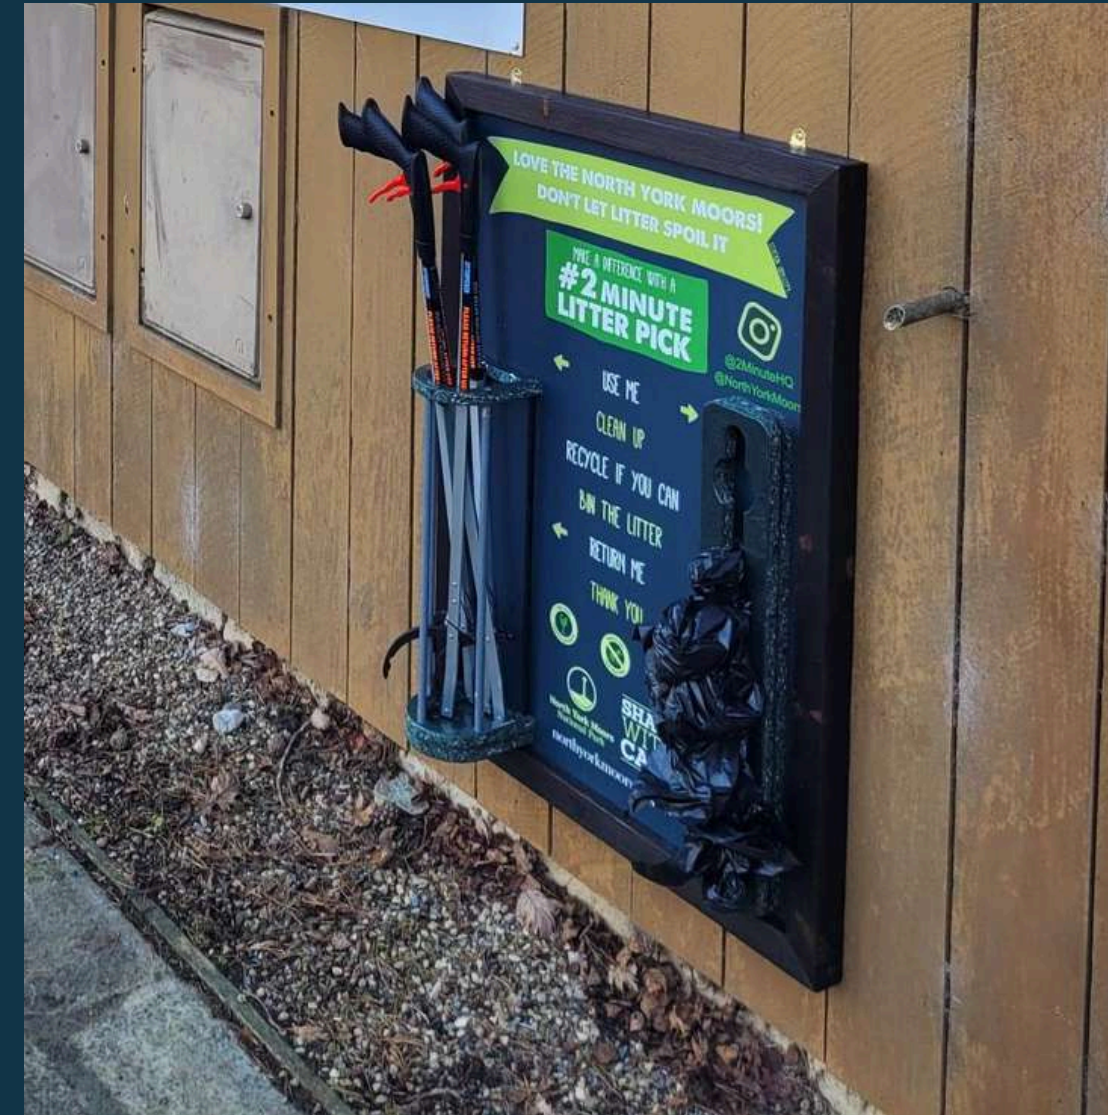

RE:STATION. FIXED

FROM £300

Designed and built in-house, the Fixed station is crafted from post-consumer recycled (PCR) plastic waste, repurposed from shop displays, along with discarded tent materials and poles diverted from landfill. It also features FSC-certified timber, protected with a flame treatment and two coats of non-toxic stain sealer.

Key features include:

- **Secure Installation** – Mounted via four brass lugs, perfect for locations where pavement space is limited or the station remains in place overnight.
- **Customisable Graphics** – Printed directly onto recycled Aluminium Composite for durability.
- **Lightweight & Compact** – Weighs under 10kg and measures 900mm x 700mm x 200mm.

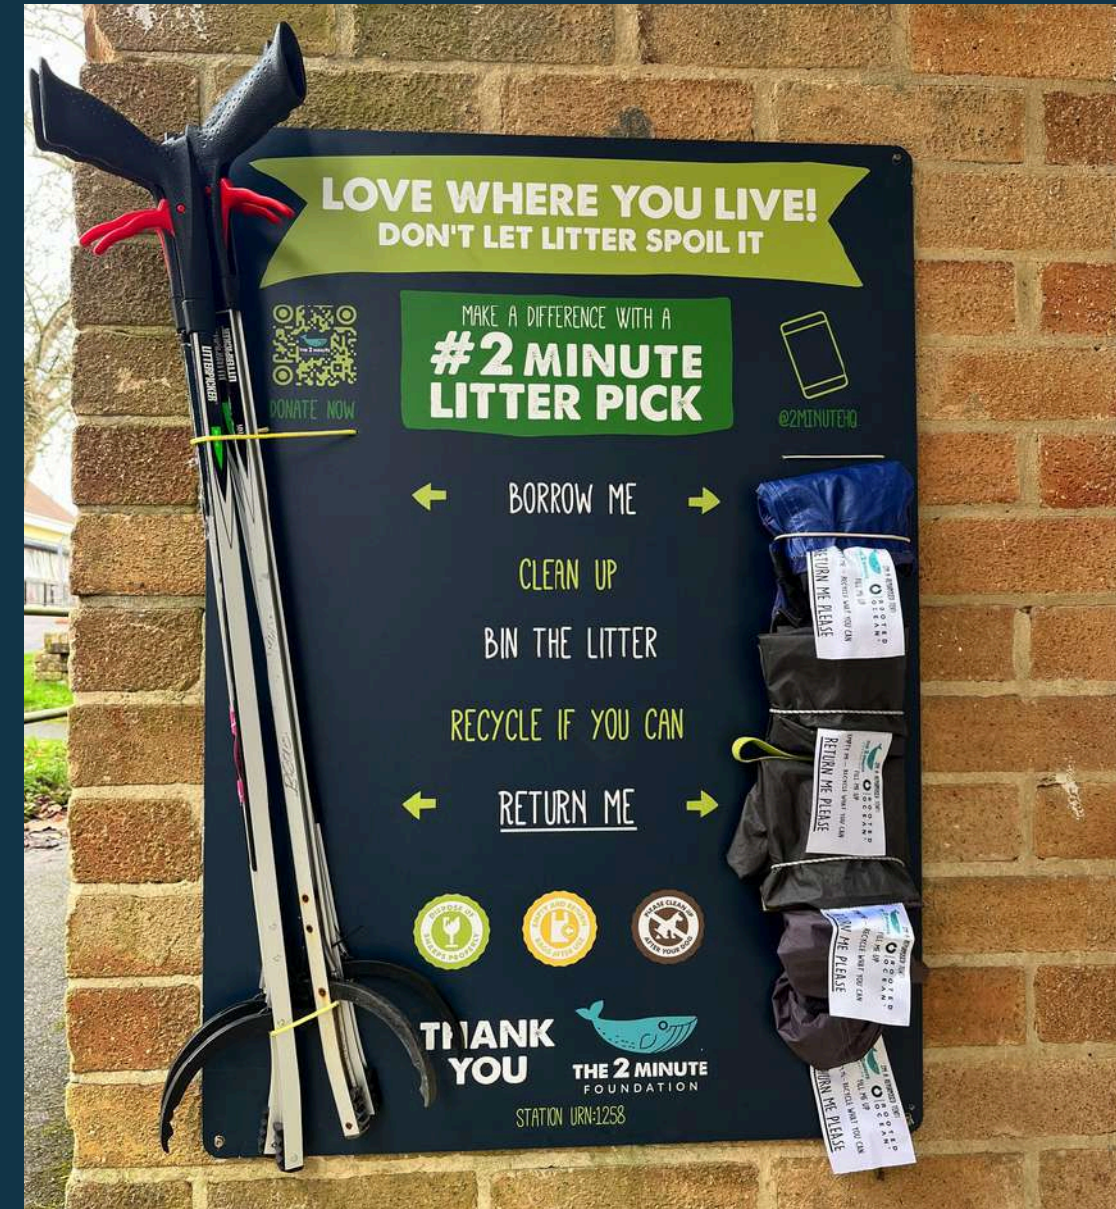

Available in two styles – Litter Pick or Beach Clean.

THE CORE. £150

LITTERPICK.

THE CORE.

FROM £150

The Core Station is a simple, effective solution designed to empower communities and encourage clean-up efforts, making it the perfect starting point for accessible, impactful environmental action.

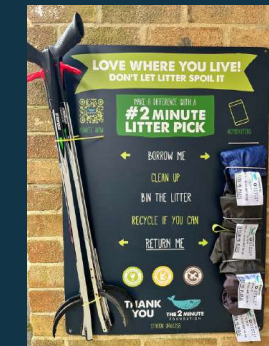

Key features include:

- **Sustainable Design** – Printed directly onto recycled Aluminium Composite, with repurposed elastic and rope from upcycled tents to hold 3 litter pickers and at least 5 reusable bags.
- **Affordable & Streamlined** – No outer frame or customisation options, keeping costs low while maintaining impact.
- **Lightweight & Compact** – Weighs under 5kg and measures 850mm x 600mm x 10mm, making it easy to move and store.
- **Ideal for Supervised Locations** – A great fit for community hubs, schools, and events.

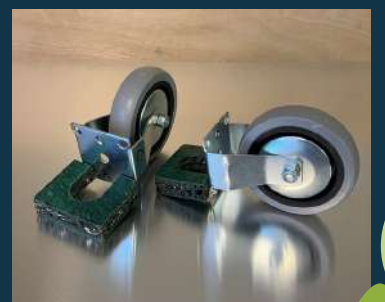

Available in two styles – Litter Pick or Beach Clean.
