# How to Recover a Coinbase Account? Quick Fix for Locked Accounts

**Direct Answer**

To recover a Coinbase account, go to the Coinbase sign-in page, enter your email and password, and follow the account recovery or identity verification process. ☎ ((+1 888 ➶ 634 ➶ 2381)), You may need to upload a government ID, confirm your email, and complete 2-step verification. 1❋888⸺634⸺((2381)) , After verification, your account access is usually restored within 24–48 hours. (( +1 ≫ 888 ≫ 634 ≫ 2381 )),

**Problem Explanation**

Sometimes Coinbase users cannot log in because their account is locked, restricted, or stuck in verification. +1↺(888)⋆[634]⋆[2381], This can happen if the system detects suspicious activity, if the user forgets their password, or if they lose access to their phone used for two-factor authentication. ☎ ((+1 888 ➶ 634 ➶ 2381)),

When this happens, Coinbase temporarily blocks access to protect the account until the real owner completes identity verification and security checks. 1❋888⸺634⸺((2381)) ,

**Possible Reasons**

**1. Suspicious Login Activity**
 Coinbase may lock the account if it detects a new device, location, or unusual login attempt. (( +1 ≫ 888 ≫ 634 ≫ 2381 )),
